

# MANAGED ENDPOINT SECURITY

## Total Security for Your Business

95% of small and midsize businesses have an antivirus installed, but 74% still experienced attacks last year!

### Threats facing Small to Medium Businesses today

- Email worms
- Network viruses
- Spyware
- Data theft
- Email spam and malware

### Benefits of Endpoint Security

#### Fully managed solution for the same price as your antivirus software!

We include enterprise class end point software, monitored by us 24/7, and managed by an expert technical engineer that will provide you with reports to ensure you know how well you are protected at all times!

#### Reduce operating costs

A real security threat can stop you from being 100% productive at work. This costs the company a lot of money in lost productivity and in opportunity costs. We will avoid those issues that are avoidable and save you money!

#### Protect your company's critical assets and information

Proactive technologies ensure an additional protection layer against all types of unknown malware, targeted attacks and Internet threats.

#### A flexible security solution

Our wide variety of advanced security features offer the right security level for any size of company and network installation.

#### Information is key!

No longer will you be unsure of how well you are protected. We will provide you with reports monthly that let you know that you are safe!

#### Total Peace of Mind

It is no longer about buying an antivirus solution, installing it, and then hoping it works. Now you can rest assured that your information is safe knowing that there are group of experts taking care of it for you. And all for the same price!

“Almost 50% of SMBs shut down external network access during serious external attacks; for many SMBs, this can cause crippling revenue loss”

- Gartner

### KEY FEATURES

#### Enterprise Class Solution

Encompassing more than just antivirus, this solution supports full endpoint security.

#### Most advanced proactive technology

The most recognized proactive technology, composed of intrusion prevention, proactive detection and behavioral analysis

#### Anti-spam for desktops

Based on Recurrent Pattern Detection, a content-agnostic technology that detects and blocks spam in any language

#### Software Firewall

Allows even laptops outside of the network to be fully protected.

#### Full Transparency Through Reporting

Wide range of detailed reports are provided monthly to ensure that you know what is happening and that you can breath easy knowing that you are protected.

#### Fully Monitored System

We will monitor the software to ensure that it is always working and will act immediately if it is not!

## Why our Clients Choose Managed Endpoint Security!

### Stand-alone Anti-virus software:

- Provides a point solution to specific issues
- Requires manual monitoring & maintenance to remain current and effective
- Relies on end-user decisions for operation
- Does not provide consistent version control across desktops
- Does not provide centralized management

### Managed Endpoint Security:

- Provides proactive & comprehensive security, monitoring and management
- Centralizes the deployment and updating of software to ensure coverage and consistency
- Automates management processes to avoid errors and reduce costs
- Leverages expert IT skills
